 LOUVOLITE

BLIND CONTROL FROM *anywhere in the world*

WITH LOUVOLITE ONE TOUCH® MOTORISATION

roller | vision® | roman | pleated | cellular
perfect fit® | vertical | visage® | allusion®

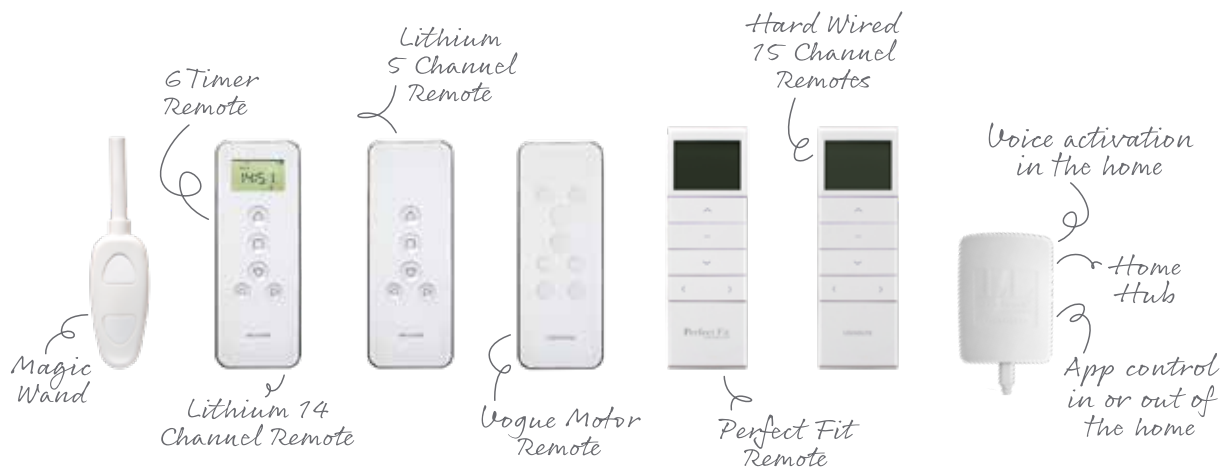

The way we use our homes is changing and because of that we have developed our One Touch® family so you can do more living. Simple, convenient and easy to use, Louvolite One Touch® makes luxury affordable with motorisation accessible to all.

An innovative range of battery operated and mains powered blinds you can operate multiple blinds with remote control, voice activation with Amazon Alexa and Google Home or operate them while away on holiday with our app!

Our fantastic timer remote and app allow you to pre-set your blinds for convenience or added home security when you're out.

The rechargeable battery powered solutions remove the need for mains wiring, making it easy to install and without disruption to your decoration.

Louvolite One Touch® is a popular choice for the multiple windows in conservatories, shading large bi-fold doors or just for those that want easy blind operation on the go or from the comfort of the sofa.

WITH VOGUE

Filter the light from anywhere in your room with motorised Slimline Vogue[®] and Allusion[®]!

You can operate up to 5 blinds, rotate the louvres 45° or 90° clockwise or anticlockwise until fully closed using the remote or with the home hub using the app or voice control.

To fully draw open or close the blinds just use the slim wand which hangs at the edge of the blind.

When the motor light flashes red just plug the 3m long charger into a power source for 6-8hours.

BE ON THE GO WITH the app and home hub

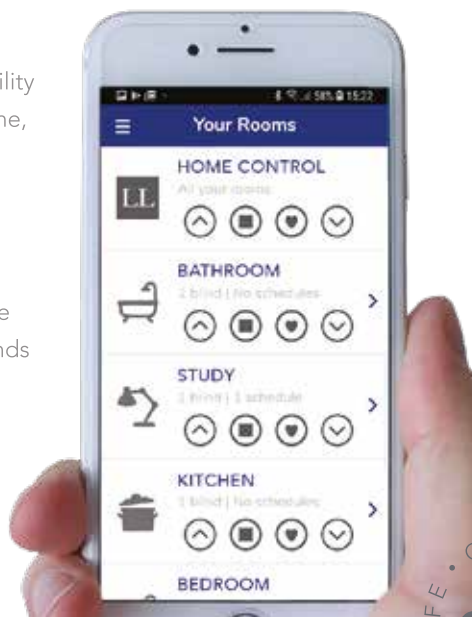

The Louvolite Home Hub connects to your WiFi so that motorised One Touch window blinds can be operated straight from a smart device.

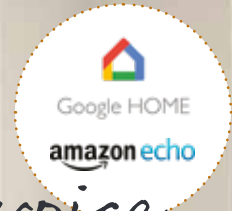

Just download the free and easy to install app, pair your blinds and operate them separately or together remotely! If you already have Louvolite One Touch® blinds, the home hub and app will work with them too.

It's excellent for privacy and security with the ability to open or close the blinds when out at work or away on holiday.

Installing the Home Hub makes life easier by offering the ability to control all your window blinds in a number of different ways. They can be operated by remote control, using voice control with **Amazon Alexa** or **Google Home** or via the app on your smart device whether you're home or on the go.

- The Louvolite Home Hub connects via WiFi and operates the One Touch® Lithium 1100 Series and A/C 1500 and 6000 Series motors.
- Use voice control to open or close your blinds with Amazon Alexa, Dot and Echo and Google Home.
- Improve your home security with the ability to open or close the blinds when at home, out or away on holiday.
- Free, easy to use app available for IOS and Android.
- Use your smart phone device to view the rooms in your home and control the blinds within them.
- Control up to 15 blinds individually, by room or all together.
- Child safe by design.
